

# Fire Safety

Test smoke alarms monthly. ☐

Know two ways out of the house. ☐

Decide on a place for your family to meet after  
you're outside of the house. ☐

If there's a fire, leave the house right away.  
As you leave, stay low and crawl. ☐

Always feel doors before opening them.  
If hot, do not open and find another way out. ☐

Call the fire department from a phone outside the home. ☐

Keep matches, lighters and candles out of children's reach. ☐

Never smoke in bed. ☐

Store gasoline, paint thinner and ammonia outside the home. ☐

Replace frayed electrical wires and cords that can set  
fire to carpeting and rugs. ☐

**Get *ALARMED* and get out *ALIVE*.**
